Raj Kapadia

Software Developer

github-profile   rajkapadiat02@gmail.com   portfolio website

Profile

Motivated and adaptable software developer with a solid background in business and supply chain logistics. Experienced in web development with proficiency in HTML, Bootstrap, CSS/SCSS, and JavaScript. Completed two certifications on freecodecamp. Familiarity with Python, AI/LLMs, React.js, Node.js, Express.js, API, Postman, Jest testing, Git, GitHub, CI/CD, and blockchain. Strong team player with a positive attitude and a knack for remote collaboration.

Education

FREE CODE CAMP

- *Responsive Web Design* — NOV-2021

- *JavaScript Algorithms and Data Structures* — MAR-2022

CITT- TRANSPORTATION SYSTEMS — JUL-2018

SENECA COLLEGE
International BUSINESS — AUG-2017

Skills

- Web Development: HTML, Bootstrap, CSS/SCSS, JavaScript, React.js, Figma
- Programming Languages: Python
- Frameworks and Libraries: Node.js, Express.js
- API Development and Testing: Postman, Jest
- Version Control: Git, GitHub
- Continuous Integration and Deployment: CI/CD
- Emerging Technologies: AI/LLMs, Blockchain
- Data-Structures & Algorithms
- Remote Collaboration and Teamwork
- Knowledge of backend components such express, Mongo-Db or any other MVC architectures.
Interest

Projects

Currency Conversion

- Developed a dynamic Currency Conversion application using HTML, CSS/SCSS, and JavaScript.
- Utilized Exchange Rate API Goldapi.io to fetch real-time currency exchange rates.
- Successfully implemented a user-friendly interface for seamless currency conversion.
- Project Link: Currency Conversion Project

Image Gallery App

- Built an impressive Image Gallery App with REACT-JS, HTML, and CSS/SCSS.
- Integrated the powerful Unsplash API to fetch and display high-quality images.
- Implemented advanced features like image search and filtering for enhanced user experience.
- Project Link: Image Gallery App Project

Dog Breeds

- Created an engaging Dog Breeds application using HTML, CSS/SCSS, and JavaScript.
- Integrated the dogceo API to retrieve and showcase various dog breeds and their details.
- Designed an intuitive user interface with interactive features for a delightful browsing experience.
- Project Link: Dog Breeds Project

Horse Race Game

- Developed an exciting Horse Race Game using HTML, CSS/SCSS, and JavaScript.
- Implemented a realistic gaming experience with animated horses and dynamic race outcomes.
- Demonstrated strong problem-solving skills by handling game logic and ensuring smooth gameplay.
- Project Link: Horse Race Game Project

iPhone Calculator

- Created a fully functional iPhone Calculator using JavaScript, HTML, Bootstrap, and CSS/SCSS.
- Showcased proficiency in front-end technologies and responsive design principles.
- Developed a sleek and user-friendly calculator interface with accurate calculations.
- Project Link: iPhone Calculator Project

Experience

Logistics Coordinator • PET VALUE • Etobicoke, Ontario   (JUN/2022 – DEC/2022)

- Managed domestic and import operations, data & analysis, and customs brokerage to support efficient logistics.
- Managed daily store and DC operations for reporting weekly performances to seasoned team members
- Implemented successful store deliveries software launch and maintained any bottlenecks in the process
- Managed freight forwarders, carriers, and customs brokers to ensure compliance with regulatory agencies and CBSA.
- Utilized technology solutions such as TMS, FBA, and other tools in partnership with IT to streamline logistics processes.
